

Music Center BT

The Music Center BT stereo hi-fi amplifier is distinguished by its aptX Bluetooth receiver for wireless listening from any smartphone, tablet or computer compatible with Bluetooth. Using the proven quality of aptX coding for Bluetooth, we offer you the best listening for your music stored on your portable devices. The Music Center BT houses the best of digital technology : FM RDS, DAB/DAB+, CD player, optical input and USB input (compatible with MP3/WMA). The Music Center BT's ICEpower® amplification module offers audio performance of the highest order. Characterized by high efficiency and delivering 2 x 120 watts of power comfortably into 4 Ohms, it provides refreshing versatility and may be paired with demanding speakers. The Music Center BT is a refined and stylish contemporary design object.

Designed and engineered in France.
Design by Jean-Yves le Porcher.
